

----- FOR IMMEDIATE RELEASE -----

Delmhorst Instrument Co. at Connections 2008!

CONNECTIONS
CONVENTION AND TRADE SHOW

Situated at a corner booth adjacent to Jon Don, Delmhorst returned to Connections in force with exciting new products ideal for cleaning and restoration professionals.

Delmhorst's **Navigator Pro** was very well received by attendees and exhibitors alike. Equipped with pin mode, pin-less scan mode, and a detachable thermohygrometer, the Navigator Pro features revolutionary job grouping by room and location (floor, wall, ceiling).

New to the scene was the **TechCheck** which turned heads with its simplicity and versatility. Sharing the same dual pin/pin-less modes as the Navigator Pro, the TechCheck features a streamlined interface for out-of-the-box ease-of-use.

Attendance numbers at Connections exceeded expectations and as usual the quality of dialogue with attendees and other exhibitors was top notch. This landmark show was a rare opportunity for the cleaning and restoration industry to learn from colleagues and display the latest tools of the trade.

Delmhorst is proud as always to participate and support its network of loyal distributors. Always on the forefront of innovation and customer service, there is a Delmhorst moisture meter just for you, no matter the challenge.
