

----- FOR IMMEDIATE RELEASE -----

Another Successful NWFA for Delmhorst and Taylor Tools

Following a successful showing at Surfaces 2008, Taylor Tools and Delmhorst Instrument Co. appeared together at the National Wood Flooring Association 2008 Conference and Expo in Fort Lauderdale, FL which was the largest convention anywhere dedicated exclusively to wood flooring.

Taylor Tools is the National Distributor of Delmhorst flooring moisture meters and at neighboring booth, Delmhorst demonstrated the operation its full line of meters in support of that partnership. Delmhorst featured its flagship flooring moisture meter, the **Total Check**, which measures MC% in pin mode or scan mode, and displays Temperature/RH and Dew point/GPP with its detachable thermo-hygrometer. Total Check is also on the leading edge of industry trends with conformity the ASTM F2170 standard for testing relative humidity in concrete. Also featured was the **Tech Check**, a streamlined meter with one button switching between pin and pin-less moisture measurement.

Another highlight was NWFA's Moisture Meter Symposium, where Paul Laurenzi joined other moisture meter manufacturers in explaining the uses of pin type, non-penetrating, and RH/T moisture detection and the technology behind them. Paul elaborated on the electrical resistance technology used in pin type meters, and stressed the advantages of using a moisture meter throughout the installation process to avoid defects and to provide reliable information for insurance claims. During the Q & A session and later at the Delmhorst booth, attendees were appreciative of the insightful information.

In this challenging market, it is more important than ever to have the right tool for the job to avoid costly callbacks. As always, Delmhorst represents the latest and most versatile moisture sensing equipment on the market and continues to be on the forefront of industry events with its participation at NWFA 2008 and other upcoming events.
