

----- FOR IMMEDIATE RELEASE -----

Delmhorst and Taylor Tools Unite at Surfaces 2008 & NWFA 2008

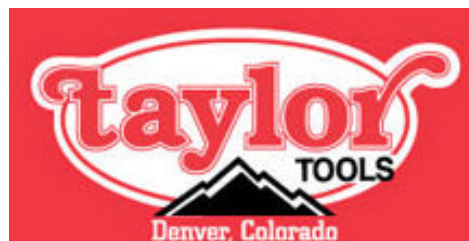

For over a year, Taylor Tools has represented Delmhorst Instrument Co. in the flooring industry as its National Distributor of flooring moisture meters. In support of this partnership, Delmhorst and Taylor appeared together at Surfaces 2008 at the Sands Expo Center in Las Vegas, NV.

In a booth neighboring Taylor Tools, Delmhorst educated floor covering experts from across the country on the importance of moisture monitoring throughout the installation process. Delmhorst featured a full line of flooring moisture meters including the **Total Check**, which was a hit with attendees. The **Total Check** measures MC% in pin mode or scan mode, and displays Temperature/RH and Dew point/GPP with its detachable thermo-hygrometer. New to the show was Delmhorst's **Tech Check Moisture Meter**, a streamlined meter with one button switching between pin and pin-less moisture measurement.

Flooring professionals can look forward to seeing Taylor and Delmhorst together again at the National Wood Flooring Association 2008 Conference & Expo in Ft. Lauderdale, FL at the Greater Fort Lauderdale/Broward County Convention Center. From March 26th to March 29th, Delmhorst and Taylor will exhibit at the largest convention anywhere dedicated exclusively to wood flooring. Delmhorst is also excited to be participating in NWFA's Moisture Meter Symposium on March 26th from 11:30AM – 12:45PM in room 122 at the convention center.

In this challenging market, it is more important than ever to have the right tool for the job to avoid costly callbacks. As always, Delmhorst represents the latest and most versatile moisture sensing equipment on the market and continues to be on the forefront of industry events with its participation at Surfaces 2008 and its upcoming presence at NWFA 2008.
