March 2004 -- FOR IMMEDIATE RELEASE

******Product Improvement******

Delmhorst Instrument Co. has improved the quality of the pin-less ACCUSCAN meter in two ways:

- 1. Mechanically fastening the sensor pad to the meter – ensuring that the pad will remain attached.**
- 2. Including a revised panel meter with increased damping - creating a higher level of ruggedness**

Accuscan still offers these same outstanding features:

- Easy to read analog readout
- Measures %MC on wood over the range of 6-40%
- 0-100 reference scale for non-wood building materials
- Built-in battery and calibration checks
- ¾" penetration
- 1-year warranty
- Rugged carrying case

“We have listened to our customers’ feedback on ACCUSCAN, and are confident that the changes we have made will enhance the quality of the meter and satisfy our customers’ demands,” notes Paul Laurenzi, Vice President -- Sales and Marketing at Delmhorst. “For nearly 60 years, we have provided the highest quality moisture meters, and we will continue to do so.”

Delmhorst – when accuracy is the point™.
